

Street Lighting Services

The NEW option for street lighting maintenance and installation.

Using our multidisciplined teams and large company buying power, we offer exceptionally competitive pricing combined with the Peek and Imtech reputation for quality work completed to the highest levels of safety.

A Long History in Street Lighting

Since 1888 when Imtech's founder, Jan Jacob van Rietschoten, installed one of the first public electric lighting systems in Rotterdam and in 1936 when Nettenbouw, a founding Imtech company, was responsible for the first sodium lighting in the Netherlands, Imtech has been at the forefront of street lighting. Imtech, the 2nd largest street lighting company in The Netherlands, are now bringing their wealth of street lighting experience to the UK through Peek, part of the Traffic & Infra Division.

Capability

Peek is an established company operating throughout the UK and Ireland with 14 offices and over 500 employees (450 field and project staff) with an enormous amount of experience of operating on the highway. At any one time Peek has an average of 30 maintenance contracts operational with local authorities varying from £20k per annum to £5m per annum, and 200 installation contracts varying from £5k to over £6m. Peek's day to day operations include the civil and electrical engineering installation of poles, ducting, cables, feeder pillars, lanterns/heads, control equipment and the liaison with clients, contractors and suppliers. Peek also carries out vast numbers of fault finding and repair tasks daily to equipment at the side of the road, throughout the UK, in all environments. Our site teams are all trained to the requirements of Sector 8.

Street Lighting Services

The NEW option for street lighting maintenance and installation.

Working with our Clients

Peek has a reputation for developing honest and open working relationships with our clients. Throughout the business, we work with the ethos that understanding and helping to solve our customers issues leads to 'Shared Success'. From providing short term cover services to carrying out long term, high value PPP projects, we can provide the right solution for your requirement.

Multidisciplined Teams

We are possibly unique in being able to offer multidisciplinary teams that have the skill and experience to carry out work on the majority of technology employed on the highway, including street lighting. Recognising the requirement to provide value for money, we believe that this ability can provide savings to our clients where previously not considered or not possible.

Asset Management & PPP (Public Private Partnership)

We are aware of the acute financial restraints placed upon clients in the current economic climate, but also understand that the lighting stock is often failing due to a lack of previous investment. To assist in determining the lowest cost, best value approach to maintaining the assets, we can provide data analysis, modelling, costing, report preparation, funding, full provision of project management, equipment and services.
