

ITI Design Services

Delivering transport solutions from inception to completion.

ITI Design Services offers a combination of engineering, technical and project management expertise together with a range of technology solutions and services. Providing fully integrated design, equipment and project management services to the transport industry.

Quality

Peek is a Quality Assured company using processes geared towards meeting the latest in quality standards and promoting continuous improvement. ITI Design Services is committed to providing quality solutions in accordance with current best practice, guidance and statutory frameworks; while incorporating local design principles and standards, to help our customers meet their objectives and obligations with complete confidence.

Experience

Our team of experienced engineers has the knowledge, technical skills, project management expertise and a proven track record; successfully implementing fully integrated Intelligent Transport Systems (ITS) on complex transportation projects, for the public and private sector.

We offer seamless, coordinated and cost effective solutions to highway design, traffic control and project management; delivering complex transportation projects that are fit for purpose, safe and sustainable.

Flexibility

Our broad capability ensures smooth project delivery is fully achieved through a single source. However, customers can select from the range of available services, tailoring a bespoke package to meet particular project needs. This flexible approach allows customers to define and control the scale, range, scope and cost of work undertaken.

Benefits

- Tailored packages
- Efficient and effective
- Improved financial control
- Fixed price fully costed solutions
- Flexibility
- Quality Assured
- Reliable
- Single point of contact
- Local knowledge
- Total solution

ITI Design Services

Delivering transport solutions from inception to completion.

Efficient and Effective

Providing sustainable and cost effective solutions that make best use of capital funds and reduce whole life budget costs is important to our customers, and a key focus for our service. Early involvement means technology and equipment specifications can be quickly defined, while simplified administration processes ensure optimum quality is supplied in a timely manner and finances are more efficiently and accurately managed throughout the life of a project.

Support

Our aim is to establish long term, mutually beneficial relationships that help to deliver a positive and lasting impact on the local community and economy. We can provide the skills and expertise needed to enhance, supplement and compliment customers' own technical and operational capability, often using local staff and resources; to meet project and organisational demands.

Peek also offers Civil Engineering and Installation services to deliver a complete 'end to end' solution.

Engineering Competencies & Capabilities

- UTMC / SCOOT / MOVA
- Communications
- Surveys
- Traffic Modelling & Microsimulation
- Outline and Detailed Design
- Specification
- Testing, Commissioning and Validation
- Systems Engineering
- Project Management
- Demand Management
- Asset Management
- Network Health Reviews
- Operational and Technical Performance Assessment
- Cost Benefit Analysis
- Safety Audits
