

## NEWS RELEASE

October 2011

### Lighting and Signals – a multi-disciplined approach

Peek has now expanded its Urban Services capability into Public Lighting. This commenced in April 2011 with Peek being one of three companies awarded a place on the Kirklees Public Lighting and Signing Framework Contract. This contract award emphasises Peek's strong position in being able to offer a multi-disciplined solution to meet our client's needs.

#### / Continued Growth

Following the success of this first contract award, Peek has continued to grow in capability and confidence, establishing new suppliers, enhancing existing health and safety information, defining and carrying out training, marketing to existing and new clients.

In June, a further contract was awarded by North Midland Construction (NMC), working for Warrington Borough Council. The contract combines traffic signal and public lighting, forming part of a £2m major junction refurbishment. This high profile, prestigious project involves the installation of:

- The new Philips Starsense RF Central Management System (CMS)
- Philips Speedstar LED luminaires
- 10 and 12 metre aluminium lighting columns
- Small and large lit and unlit signs, including solar units
- Bollards
- Private supply cables and distribution systems (single phase and three phase)
- Removal of existing equipment and provision of temporary lighting

All of the above work is being carried out on one of Warrington's busiest primary routes and to add to the complexity, it's a dual carriageway. The works, with the exception of lighting column and large pole installation and removal, are being carried out by Peek's existing Urban services teams.

### **/ Distinct Advantages**

The project has necessitated close working relationships between Warrington Council, NMC, Peek and various suppliers, specifically Philips, who have had teams working in Peek's Trafford Park facility. Rod Raffell, NMC Senior Site Agent, Special Projects, stated "there are obvious, distinct advantages of having one contractor who can work on lighting and traffic signals; working with Peek has been good".

### **About Peek**

Peek is a leading supplier of intelligent transport solutions. For more than 30 years, the firm has been providing advanced traffic control products and systems, management and maintenance services for both the urban and highways markets. Peek's established and proven portfolio includes traffic management systems incorporating SCOOT, highway congestion management and enforcement systems, vehicle detection systems, exterior lighting, as well as supervisory and communications systems. Peek is ISO 9001:2008 and ISO 14001:2004 certified. With headquarters in Basingstoke, Hampshire, Peek employs more than 500 staff throughout the UK. Peek is part of the Infra and Traffic division of Imtech NV, a global technology services provider based in the Netherlands.

### **Imtech profile**

Imtech N.V. is a European technical services provider in the fields of electrical solutions, ICT (information and communication technology) and mechanical solutions. With more than 27,000 employees, Imtech achieves annual revenue of around 4.5 billion euro. Imtech holds strong positions in the buildings and industry markets in the Netherlands, Belgium, Luxembourg, Germany, Austria, Eastern Europe, Sweden, Norway, Finland, the UK, Ireland and Spain, the European markets of ICT and Traffic as well as in the global marine market. In total Imtech serves 21,000 customers. Imtech offers added value with integrated and multidisciplinary total solutions that lead to better business processes and more efficiency for customers and the customers they, in their turn, serve. Imtech also offers solutions that contribute towards a sustainable society, for example in the areas of energy, the environment, water and mobility. Imtech shares are listed on the NYSE Euronext Amsterdam, where Imtech is included in the Midkap Index. Imtech shares are also included in the Dow Jones STOXX 600 index.
